## Income Statement Problem

Prepare Income Statements for the years 20X1, 20X2, and 20X3 by the Completed Contract Method and the Percentage of Completion Method for the construction firm's data shown below. For Percentage of Completion, show calculations by Alternative A and Alternative B, measure the work progress by Cost to Cost and Labor Hours for both alternatives, up to "Revenue to Date". Continue Alternative A (by both work progress measures) thereafter to the end (Adjustment to Retained Income). Income Tax is 40\%.
